

SERVICE AND SATISFACTION IS OUR PRIORITY

## ■ PHILOSOPHY

PT Hexa Prima Energy is committed to undertake all work based on highly professional working procedures and standards with the primary goal being to achieve the high quality performance and high standards of safety.

# ■ About Us ■

“ IT IS OUR CAPABILITY TO COMPLY  
WITH THE REQUIREMENTS  
OF OUR CUSTOMERS.”

We focus on providing  
various types maintenance  
services for Power Plants,  
Oil & Gas industry.

HEXA PRIMA ENERGY is a  
privately-owned company that specializes  
in mechanical and electrical products and  
services for power plants, and  
maintenance services for on-shore oil &  
gas rigs throughout Indonesia.

Established in Jakarta in 2004 by Mr.  
Halim Suwandi, PT Hexa Prima Energy  
focuses on providing various types of  
high tech coating, insulation & services  
for power plants, and maintenance  
services for the oil & gas industry.  
Since 2004, we have continued to grow  
and build our company, which was  
officially registered as a Private Limited  
Company (Perseroan Terbatas) in 2008  
as PT HEXA PRIMA ENERGY.

■ “Our dream is to become a dependable and highly professional company providing high quality products and services.”

# ■ Vision & Mission ■

“ WE PROVIDE COST  
SAVING SOLUTIONS.”

## **VISION**

To become a dependable and highly professional company providing high quality products and services for power plant, oil & gas companies in Indonesia.

## **MISSION**

To contribute to the power plants and oil & gas industries by providing high-tech products that can deliver power plant operational cost savings that could ultimately ease the selling price of electrical energy in the community.

■ “HIGH PERFORMANCE  
TURBINE SERVICES.”

## ■ Products & Services ■

### ▶▶▶ PRODUCTS

We provide several types of mechanical and electrical products and equipment for the power plant, oil & gas industries, such as:

#### Special Coating

- Thermal insulation coating (TIC)
- Ceramic coatings
- Anti condensation coating
- Under water coating
- High temp coating

#### Turbine Insulation

- Gas turbine insulation
- Steam turbine insulation
- Boiler insulation
- Pipe & valve insulation
- Cold insulation
- 3D insulation design

#### Expansion Joint

- Gas and steam turbine expansion joint
- Special expansion joint
- Super bolt
- Instrument part
- Hydraulic tools
- Nord lock

#### Special Tools For

- Power Plant
- Oil & Gas
- Inspection

#### Pipe & Tubing

- Duplex
- Fiber Glass

#### Special Chemical

- Compressor cleaner
- Amine
- Corrosion inhibitor

## ▶▶ SERVICES

### Power Plant Maintenance

- Minor inspection
- Major inspection
- Hot part turbine inspection
- Field service specialists (expat)
- Complete overhaul services
- Coating specialist (certified)
- Manpower Supply

### Special Cleaning for Turbine & Compressor

- Dry ice blasting / Cleaning
- Ultrasonic Cleaning
- Tank cleaning

### Construction

- Civil Work
- Blasting Painting
- Dreging
- Piping
- Conveyor
- WTP

### Rental Equipment & Special Tools

- Infrared thermografi
- Thermestesia meter
- Boroscope
- 3D scanner
- Oil spill respons

### On-shore and Offshore Maintenance Coating

- Equipment repair and reconditioning
- On-site Machining
- Insulation system
- Special coating
- Blasting & painting
- Colodic protection

### Inspection Services

- Corrosion
- Vibration
- RBI
- Under Water
- Inspector
- Piging
- Structure

# ■ Our Strenghts ■

►►► We strive to be a partner that can provide comprehensive solutions in the field of power plants with the aim of increasing production efficiency.

## Competence & Flexibility

We have the capability to complete the project to full client satisfaction within the pre-determined timeframe. In some urgent cases, we are able to make deliveries of products with large tonnage and supply technicians from abroad in less than a week. We are also capable of shipping potentially toxic materials in a timely and secure manner. As concrete evidence, for 9 years as a partner of SIEMENS INDONESIA, we have always been able to fulfill our project commitments within the pre-determined time and with excellent quality.

## High-Tech Products & Services with Certification and Warranty

All the products and services we provide have an official certificate and warranty. They are all OEM approved high-tech products and services that have proven quality and are complete with internationally recognized certification and a warranty ranging from 2 to 10 years. One example of the high technology products that we provide are insulation products which can keep the temperature in the outer layer of insulating material (ambient temperature) to a maximum of just + 20°C from room temperature when applied to a machine with a temperature of up to 1,100 degrees centigrade.

## Total Solution with a Complete Range of Products for the Satisfaction of the Client

PT Hexa Prima Energy strives to be a partner that can provide comprehensive solutions in the field of power plants with the aim of increasing production efficiency. This is made possible with an up-to-date range of high technology products and comprehensive services from us. Using the latest technologies efficiency will be further enhanced, and as evidence of the quality of the total solution we offer, besides high quality products we also provide technical advice and will also undertake projects outside of our normal fields of work.

## Work Processes in Accordance with Client and Principal Standards

All of our work processes are closely monitored and must be in full compliance with the SOP of our principals, such as **ARNOLD, BRONYA AND MEDWAY**, which are internationally recognized world class companies in the field of coating and who apply very strict quality and safety standards. In addition, we always apply the work standards of our clients.

## Certified and Experienced Experts

Many of our technicians have more than 10 years of experience and possess excellent technical skills and know-how. Some of our technicians hold master's degrees and have official certification in their respective fields from independent certification agencies in addition to official certification from principal product manufacturers.

## Mobile Tools for Excellent Support

In order to ensure fast and reliable service we deploy mobile tool sets for quick repairs in the field. Our mobile tool sets are set up in a container which are ready to be quickly moved to locations where rapid treatment is required.

## 24-Hour Support by Local and Foreign Experts

Our own qualified technicians are fully supported by both local and foreign experts. We are ready and capable of handling all urgent needs of our clients at all times, 24 hours 7 days a week and even on national holidays.

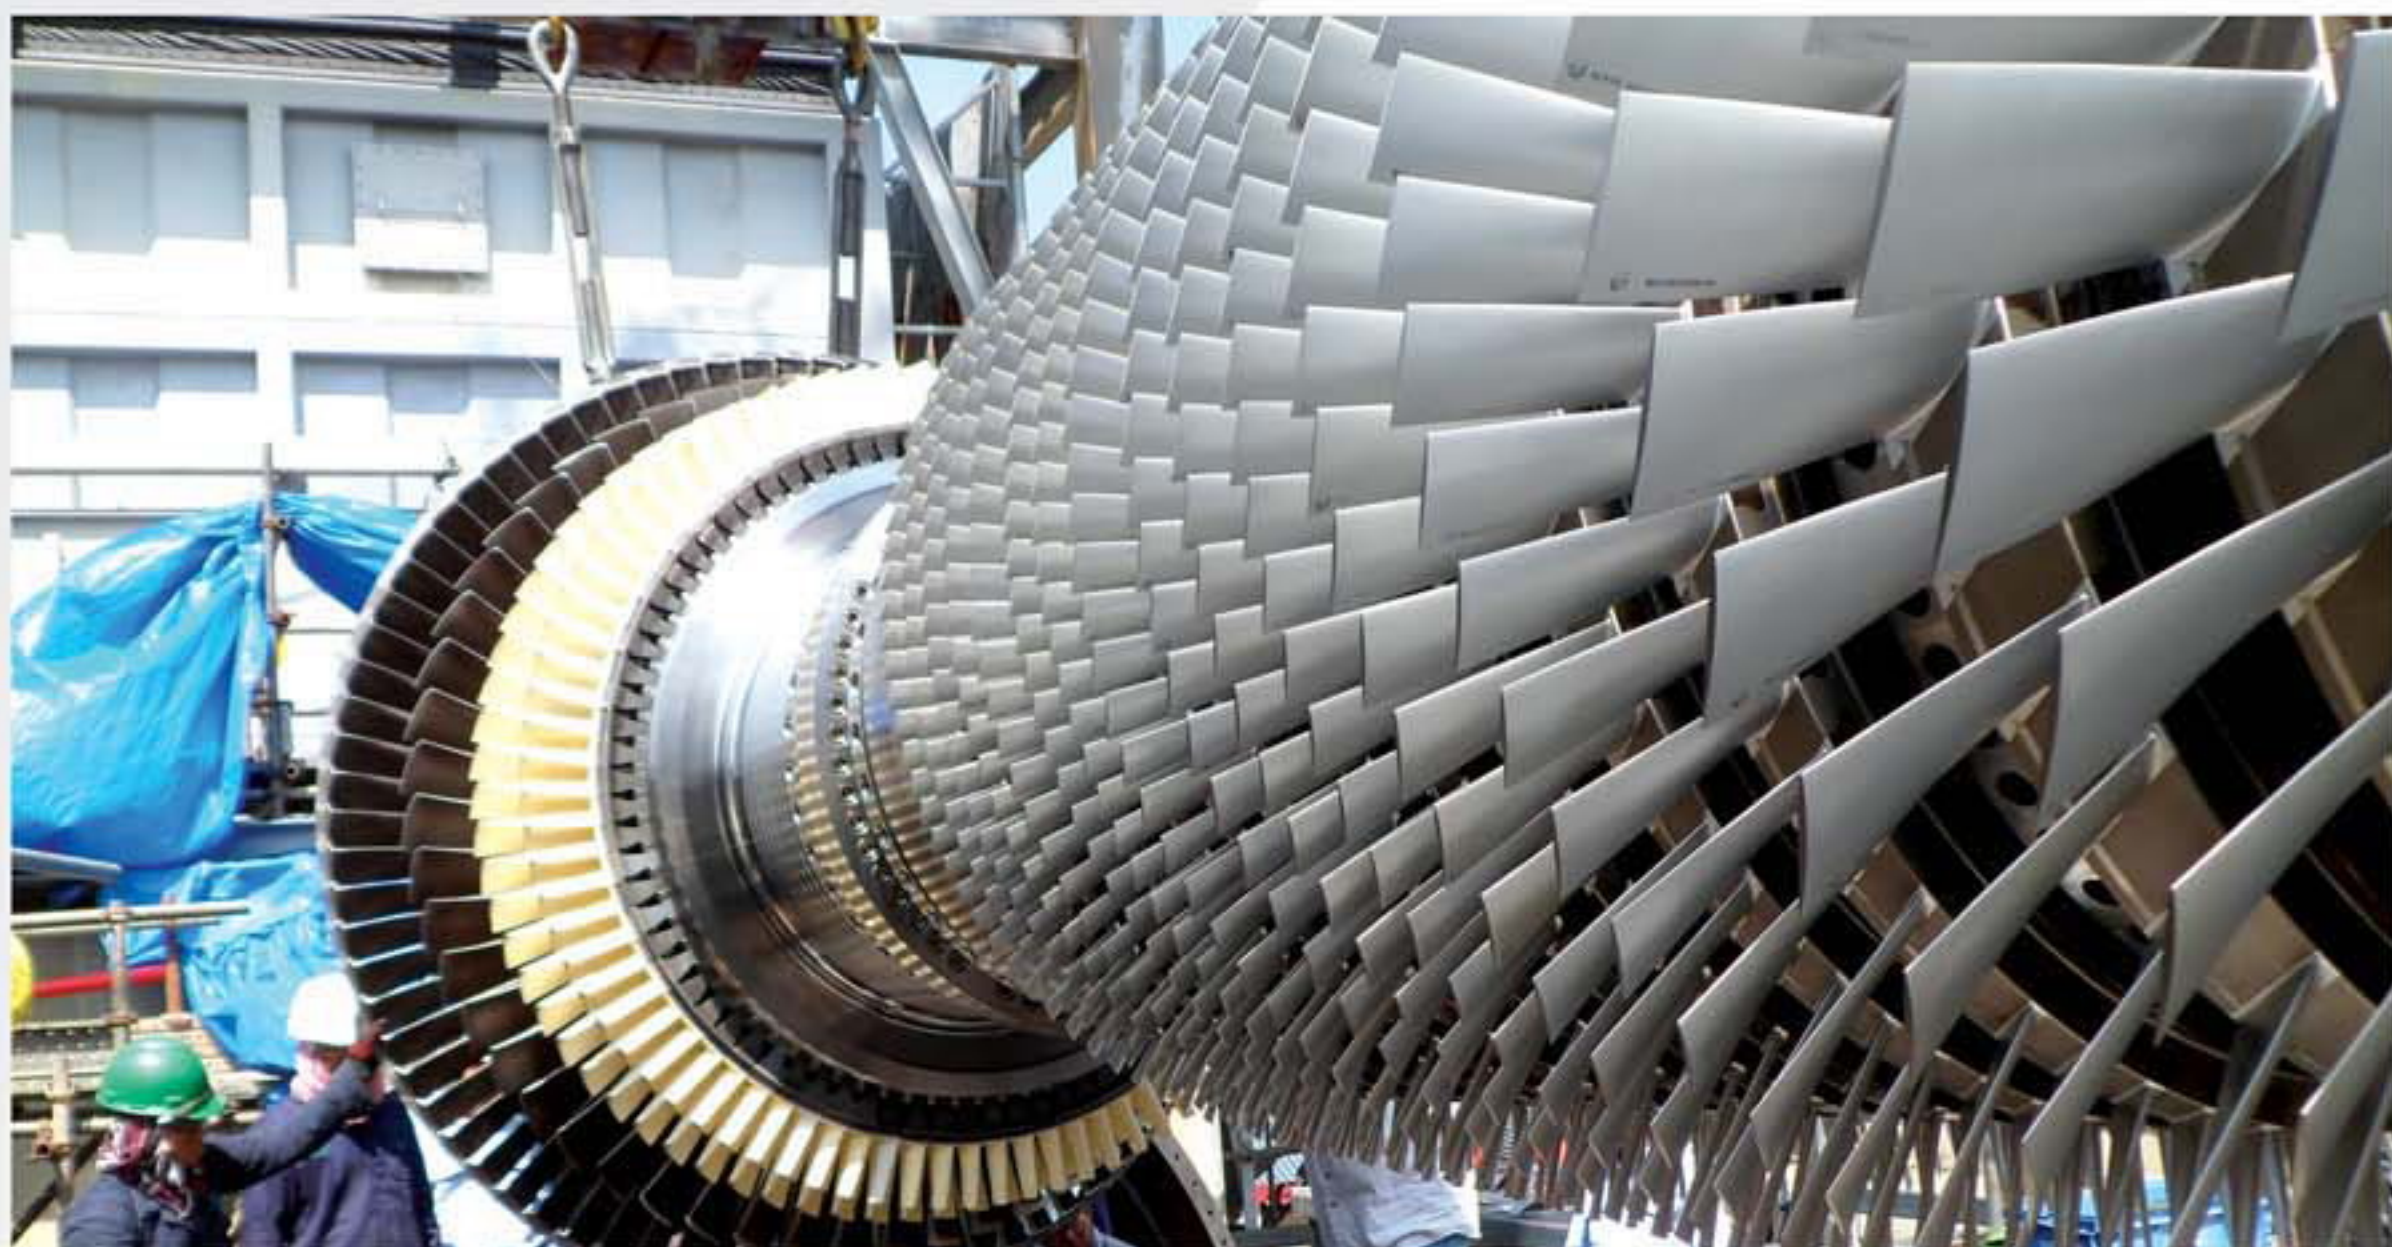

# ■ Quality Control ■

“We are committed to providing our clients with the best in products and services”

We apply strict quality controls for all installations that we undertake. Quality control measures invoke a multi-layer system carried out in three stages.

The first stage is our HEXA internal control. The second stage is the quality control from the principal for which foreign experts are specially brought in. The third and final stage in our quality control system comes from the client. We have implemented this three stage quality control system in the completion of very project undertaken in the past eight years. This is proof of our unwavering commitment to provide our clients with the best quality in products and services.

## ■ Human Resources ■

“We continuously endeavor to improve the capabilities of our management team”

As of April 2015, we conduct our operations with the support a complete and capable team of trained and experienced human resources management personnel at our head office, as well as reliable field experts at our project sites. We have also proven to be successful in managing a certain project that involved around 150 people.

Even though our track record already shows that we have the skill and knowledge to give the best service to our clients, we still continuously work hard to improve the capabilities of our management team and our field experts through international class training programmes. Moreover, in line with the company growth due to our increasing number of clients, we will also be increasing the size of our workforce in various divisions to ensure outstanding service and the timely completion of our clients' projects.

**“ We carry out business practices and field work procedures that are environment friendly.”**

**“As a company engaged in the power plant and gas oil, Hexa consider work safety as uncompromised thing. We prioritize work safety before everything else”**

### **Standard Operating Procedure for Occupational Health, Safety & Environment**

In all the projects we undertake, we are very concerned about the health and safety of our employees. For this reason we apply a Standard Operating Procedure for Health, Safety and Environment (HSE) that includes a requirement for all employees to always use personal safety equipment such as hard hats, gas detectors, protective clothing, masks and other health and safety equipment. We also always adhere to the occupational health and safety standards of certain industries that have safety regulations which are far more stringent and specific, such as those applied in the oil & gas industry.

### **Occupational Health & Safety Consultant**

In order to ensure that our HSE is fully in compliance with standard obligations, PT Hexa Prima Energy has engaged a consultant who specializes in occupational health and safety. This is to assist us in formulating our HSE and also to provide training and certification in the field of health and safety in the workplace.

### **Strict Occupational Health & Safety Inspections**

Our employees receive training and certification in occupational health and safety. We also have a specially trained supervisor who is devoted solely to overseeing and ensuring that all occupational health and safety procedures are implemented by all our employees in the field. The strictness of our health and safety standards is also reinforced by periodic inspections from the principals and our clients. These inspections apply not only to our field operations but also to our head office.

### **Environmental Concern**

Preservation of the environment is one of our most important concerns. For this reason, we carry out business practices and field work procedures that are environment friendly. This includes properly cleaning up oil spills, and disposing of residue and waste materials, such as scrap metal and waste oil in an appropriate and approved manner so as not to contaminate the environment. Furthermore, all of the products we provide to our clients are certified as safe for the environment.
